

Neurocare KnowHow

Are you a Personal Assistant supporting a person with a neurological condition?

Are you a person with a neurological condition who employs your own PAs?

Neurocare KnowHow is a project creating a digital learning tool for care workers. It focuses on how care workers can **support people with neurological conditions**, including Multiple Sclerosis, Parkinsons, Motor Neurone Disease and more. Neurocare KnowHow will be **easy to access 'on the go'** via a smart phone or tablet. Filled with **short films** and **mini-podcasts** made with real care workers it will be fun, quick and flexible to use. An antidote to traditional e-learning!

We need you to help create Neurocare Knowhow

Your ideas will shape it

Your experiences will inform it

You can help make it work for people like you

We are looking for pairs or small groups to take part - people living with a neurological condition, with one or two of their Personal Assistants.

There will be two workshops online via video call in late October 2020 and Spring 2021.

Please get in touch for more details:

Becky (Technology Lead) 07966 913 562 | Emma (Content Lead) 07905 896 786
