

“Since I chose to become a health care professional I really fell in love with this job! You can offer so much happiness, comfort and dignity to people you care for! Someone asked me “ why you don’t become a PA” Means that you offer a life continuity to all people you care for! So ... I said “why not!” and I applied to become a PA ! My mentor who guided me through the process was Courtney Davey and she was amazing! In fact all PA Market team supported me to become what I am today! People don’t want to leave their homes but they need help sometimes to complete their life circle, happiness , stability and confidence! We are there for them! We bring them happiness and provide support for wellbeing and good health! We will become part of their lives! It is a very rewarding job and if you do it with all your heart it will bring to you too a lot of happiness! Thank you to all PA Market Team.” *Cristina*
